

ABSTRACT OF THE DISCLOSURE

A pizza oven having a baking chamber, having a loading port, and having a dispensing port; a conveyor extending longitudinally through the baking chamber from the loading port to the
5 dispensing port; an air plenum having an air intake port and a plurality of air output ports; an air blower connected to the air plenum for moving heated air from the air intake port to the air output ports; and having upper and lower pluralities of ducts respectively overlying and underlying the conveyor, each duct
10 having a proximal end attached to the plenum and a distal end, each duct further having proximal and distal air discharge ports respectively positioned proximally and distally from a vertical plane extending longitudinally along and substantially centrally through the conveyor, each duct's proximal air discharge port
15 being larger than the duct's distal air discharge port.
